- Bengali

PROFILE

My name is Soumik Dey. I am a BSc IT AI student at Maulana Abul Kalam Azad University of Technology with hands-on experience in full stack web development.

My expertise lies in building scalable and responsive applications, combining my technical skills in both front-end and back-end technologies.

Passionate about leveraging AI and modern frameworks to solve real-world problems, I am always eager to learn and grow in the ever-evolving tech landscape.

WORK EXPERIENCE

Full-Stack Web Developer Intern
DEV SEC IT Ltd. | 3 Months

During my internship, I gained hands-on experience in full-stack web development, where I worked on developing and enhancing web applications using a range of technologies. My key responsibilities included:

- Backend Development: Leveraged Laravel to build and maintain scalable, secure, and efficient APIs and web applications. Implemented features like user authentication, data management, and integration with third-party services.
- Frontend Development: Utilized Tailwind CSS and Bootstrap to design responsive, user-friendly interfaces. Collaborated closely with designers to translate mockups into functional web pages, ensuring cross-browser compatibility and mobile responsiveness.
- Database Management: Worked with MySQL to design and optimize database schemas, perform migrations, and manage data efficiently.
