SUMMARY

I am a BSc IT AI student at Maulana Abul Kalam Azad University of Technology with hands-on experience in full stack web development. My expertise lies in building scalable and responsive applications, combining my technical skills in both front-end and back-end technologies. Passionate about leveraging AI and modern frameworks to solve real-world problems, I am always eager to learn and grow in the ever-evolving tech landscape.

WORK EXPERIENCE

Web Development Training

- The journey was a remarkable learning experience where I explored the fundamentals and advanced concepts of Web Development through the DevSec IT training program. I worked with PySpark LLB, a startup company, where I enhanced my skills in web security, front-end and back-end development, and built secure, scalable web applications. I gained hands-on experience with front-end frameworks, server-side programming, security best practices, and contributed to the growth of the company through practical projects.
